

9 February 2007 *FOR IMMEDIATE RELEASE*

SQUEAKY CLEAN FOR THE CLEANING SHOW 2007

Whilst we at Bio-Productions realise that some of our processes may effect our environment, the management & staff are committed to continual review & improvement wherever possible in an effort to reduce such impact regardless of legislation or minimum standards.

The products manufactured by Bio-Productions are continually assessed for their impact upon the environment from conception to disposal & consideration is given to all aspects of their use and discharge.

Bio-Productions constantly re-evaluates waste & has processes of collection & recycling, as well as a program for technology improvements & streamlining operations to reduce energy consumption, including transportation to & from our manufacturing site.

Whilst continually self-evaluating our performance, we also keep a watch on changing legislation & policies world-wide. We were the first company to develop a non-carcinogenic urinal block and we produce more urinal blocks than any other company in Europe.

Our NEW full colour 2007 Product Catalogue is now available to distributors and doubles up as an essential reference for sales personnel and customers. Many of our products meet the growing demand for safer biodegradable, non-toxic cleaning solutions.

Please call Bio-Productions sales office for details on 01444 244000

We look forward to seeing you at this years CLEANING SHOW on our stand C20.
